

YAMAHA CLUB JORDAN COCKTAIL DRUM SYSTEM

Produced by
Steve Jordan

BASIC SET
(*CD15CJ)

CDSET
(*CD15CJ, SD08CJ and TT10CJ)

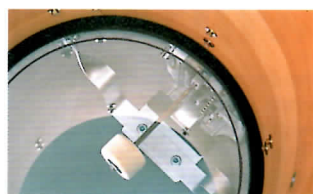

* Cymbals and Cowbell are not included.

... compact, versatile, unique and expressive.

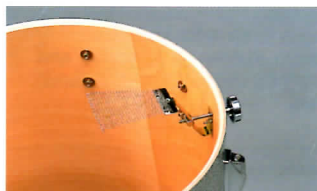

Steve Jordan had a great idea . . . and Yamaha listened. The result of this collaboration is the Club Jordan Cocktail Drum System. The main cocktail drum, made from a 15"x24" birch / mahogany shell, serves as both bass drum and snare that can be played while standing. The accessory arm accommodates a cowbell, as well as a pair of closed hi-hats and a cymbal. With or without the 8"x5" snare and 10"x5" tom, you have an extremely compact drum set that can be played in cramped clubs, or at the front of the stage with the rest of the band.

■ A special chain-driven reverse foot pedal is attached to the drum's legs for fast, stable play.

■ The bottom Remo pinstripe head is specially muffled to produce a round tone and reduce unwanted noise.

■ Snare wires under the top head are adjustable to accommodate different playing styles

■ A unique percussion board for side-shell rhythm techniques is included in a matching finish.

TT10CJ

Size : 10"x5"

Shell : Birch / Mahogany 7-ply 7mm
