

SIGNATURE SNARE DRUM

BILLY COBHAM

CUSTOM MODEL

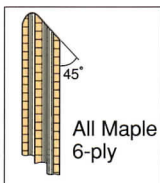

The Maple Shell in combination with our Wood Hoop creates a warm and natural sound. Extra long snares provide the sensitive response Billy Cobham demands.

All Maple Shells

Billy Cobham loves the tone delivered by the all maple shell. The 6" deep body delivers a tone that is warm with excellent sustain. Two color finishes are available, chic **Silver Sparkle** and bold **Solid Black**.

Wood Hoop

Our all maple 19-ply Wood Hoop maximize the natural sound of the shell while delivering fat, powerful rimshots.

Extra Long Snares

Extra long snares offer full contact over the entire width of the snare head creating an extremely versatile snare drum. Everything from delicate stick work to energetic performance at full volume is possible.

ASD1460BC Size : 14"x6"

NEW

Small Lugs

To get the most sound out of the shell possible, small lugs are incorporated due to their minimum lug to shell contact. Bolts attach to a precision-machined lug nut inside the casing for superior performance.

Strainer with Snare Guide

Release Side

Our H-type strainer is used on the release side while our G-type strainer is used on the butt side. Both strainers offer minimum strainer to shell contact and smooth, easy operation. Each strainer is fitted with a snare guide to hold the extra long snares precisely in place.

Butt Side
