**Drums**  
 ABSOLUTELY HANDCRAFTED

**Steel Shell With Matte Chrome Finish**

Applying a matte chrome finish to the steel shell adds a wood like warmth to the steel's characteristically sharp tone and powerful volume.

**New Type Aluminum Die-Cast Rims**

While the 3mm aluminum die-cast rims draw a bright, open sound from the drum, their lightweight aluminum composition eliminates noise produced by overtones in the higher frequencies. They also render a nice, crisp rim shot.

**Small Square Lugs**

Each of the small lugs is attached to the shell using a single bolt. Minimizing surface contact between the shell and the lug, this design allows the shell to resonate freely and deliver a natural sound.

**Strainers**

Holding the snares in place are an H type strainer on the release side and a G type strainer on the butt side. Both incorporate designs that minimize surface contact between the shell and strainer to deliver a natural shell sound. Height is also adjustable on the butt side.

**■ SPECIFICATIONS**

**SD2455JC**

Shell / Size	Steel (1.2mm) / 14"x5 1/2"
Finish	Matte chrome
Hoop	Aluminum Die-cast (3.0mm)
Lug	Small lug
Tuning Bolts	10
Snare	Short / Hi-carbon steel (clear finish) / 20 strands
Head	Batter Remo Ambassador Coated
	Bottom Remo Ambassador Snare
Strainer	Release side : H type Butt side : G type
